bioPrint UI - Shortcuts & Commands

Reference Guide | 2026-05-04

GRID & RESOLUTION

+ / =	Increase grid resolution (max 50)
- / _	Decrease grid resolution (min 2)
M	Increase HUD grid resolution
N	Decrease HUD grid resolution

PANEL MOVEMENT & SELECTION

Arrow Up	Move selected panel(s) up one cell
Arrow Down	Move selected panel(s) down one cell
Arrow Left	Move selected panel(s) left one cell
Arrow Right	Move selected panel(s) right one cell
X / Delete	Delete selected panel(s)
Escape	Deselect all / exit text editing
Shift + Drag	Disable snap-to-grid while dragging

SLOT MANAGEMENT

0-9	Load slot 0-9 in main grid
Ctrl + 0-9	Load slot 0-9 into HUD
Alt + 0-9	Load slot 10-19 (Alt+0=slot 10, etc.)
PageUp	Navigate to previous slot
PageDown	Navigate to next slot

UI PANEL CONTROL

V	Toggle control panels visibility
P	Toggle HUD on/off
K	Toggle virtual keyboard (bioKeyb)
T	Open/toggle Terminal
A	Center grid in camera (autofocus)
Ctrl + C	Clear all panels

CAMERA CONTROL

Ctrl + Drag	Rotate/orbit camera
Mouse Wheel	Zoom in/out

MOUSE / TOUCH INTERACTIONS

Single Click	Select panel
Double Click	Toggle text editing mode
Drag	Move selected panel(s)
Ctrl + Click Drag	Rotate/orbit camera

TEXT EDITING MODE

Escape	Exit text editing
Tab	Insert tab character
Enter	New line (multi-line mode)
Backspace	Delete character before cursor

VIRTUAL KEYBOARD (bioKeyb) SPECIAL KEYS

CAPS	Toggle caps lock
SHIFT	Toggle shift state
F5	Reload page
F11	Toggle fullscreen

UI BUTTON COMMANDS

Save Config	Save current grid state to JSON
Load Config	Load grid state from JSON
Download Config	Export configuration to file
Toggle Numbers	Show/hide panel order numbers
Clear Layout	Clear all panels (same as Ctrl+C)
Upload Config	Load JSON configuration file
bioFX Save	Save visual effect settings

NOTES

- During text editing, most shortcuts are disabled to allow typing.
- Only Ctrl+*, Alt+*, Meta+*, F-keys, and Escape remain active while typing.
- HUD renders at z=8 (closer to camera than main grid at z=0).
- Slots can store complete grid configurations for quick switching.

bioPrint UI - Shortcuts & Commands

Reference Guide | 2026-05-04

TERMINAL COMMANDS (toggle with T)

Type these commands in the built-in terminal.

Color Effects

`zeng`	Activate Zeng effect (blue)
`boris`	Activate Matrix effect (green)
`ann`	Activate Ann effect (cyan)

Panel Management

`select all`	Select all panels
`select 1-5`	Select panels 1 through 5
`select 1 3 7`	Select specific panels
`show`	Show panel numbers
`hide`	Hide panel numbers
`list`	List all panels
`delete <n>`	Delete panel n
`delete selected`	Delete selected panels
`delete all`	Delete all panels

Content Creation

`logo`	Create logo in selected panel
`apps`	Create grid of application icons
`social / login`	Create login with social network icons
`txt`	Add text to selected panel
`terms`	Show terms and conditions
`horizontal`	Divide selected panel horizontally
`modal`	Create modal panels

3D Models

`model`	Create 3D model in selected panel
`model rotate`	Rotate model
`model speed <n>`	Set model rotation speed
`model angle <n>`	Set model angle
`models`	Create 3x3 grid of biological models
`viewer`	Convert panel into model viewer
`codon`	Create 3D genetic transcription model
`statg`	Show genomic stats of last clicked model

Genetic / Biological

`genom`	Create DNA visualization

bioPrint UI - Shortcuts & Commands

Reference Guide | 2026-05-04

`gatc / gtac`	Show animated GATC sequence
`splice`	Start genetic splicing process
`stack`	Start genetic stack process
`index / reindex`	Reindex all panels
`pass`	Password command

Visual Effects

`flash`	Flash selected panel
`glitch`	Red refraction glitch effect

3D Bioprinting

`print`	Start 3D bioprinting simulation
`print percent [ms]`	Progress bar with percentage (ms=duration)
`print simple`	Simplified print interface
`modeling`	Start user data modeling

Slot Management (Terminal)

`saveconjunto <n>`	Save selected panels to slot n (0-9)
`saveconj <n>`	Alias for saveconjunto
`loadconjunto <n>`	Load panels from slot n (no clear)
`loadconj <n>`	Alias for loadconjunto
`hud <slot>`	Assign panel as trigger for HUD slot

Testing & Demo

`multitest`	Create test panels for multiselection
`demo`	Create complete biomedical lab demo

Utility

`help`	Show all available commands
`clear`	Clear terminal output
